

Manufacturers of the best quality dumpers on the market.

CUSTOMER TESTIMONIAL - TAMDOWN

WE INVEST IN WHAT WE CONSIDER TO BE THE BEST.

A selection of Tamdown's fleet of new Thwaites dumpers, fresh off the lorry from Leamington.

Tamdown is an award winning (Construction News Employer of the year 2016), market leading provider of infrastructure, groundwork and reinforced concrete frame services for residential, commercial and public sector developments in London and the South East.

Areas of expertise include earthworks, highways, high-rise developments and drainage. Tamdown benefits from long-term repeat business from its blue chip customer base and has a strong reputation for quality and on-time delivery.

With a new fleet of Thwaites dumpers recently purchased from Ernest Doe now hard at work, Brian Flack, Tamdown's Plant Manager comments, "As a

business we have to compete with the best in our industry and to do this we invest in what we consider to be the best plant for the job."

Brian continues, "All our dumpers are used on our own job sites, nothing is hired out externally and in our experience, Thwaites reputation for strength, safety and reliability has proven to be true. Thwaites offer good whole life value for money, with the added bonus of being British built."

"We try and buy locally where we can" concludes Brian, "Over the years we have had a good trading relationship with Ernest Doe who offer us good customer service and support when we need it."
